

Smokewatch 7th, 8th & 9th November 2009

Mon Nov 09, 2009 9:39 pm

Large scale environmental smoke was right throughout the Tamar valley. You could see it, you could smell it, and you inhaled it..

*7 Nov. 2009. Taken from West Tamar showing our Tamar valley full of smoke
It was so thick the auto focus on this camera would not function properly.
P1000037b.jpg (63.48 KiB)*

*8 Nov. 2009 Still the same. Plenty of PM2.5 in this lot.
P1000044b.jpg (210.23 KiB)*

9 Nov. 2009 See how the smoke thickens out to the right of the picture towards Launceston.
